DEMO SCENES

[CameraAnimations]
This is the camera animation of
the demo scene.
You can erase it.

[Asset]
This is the scene where all fbx files
are displayed.

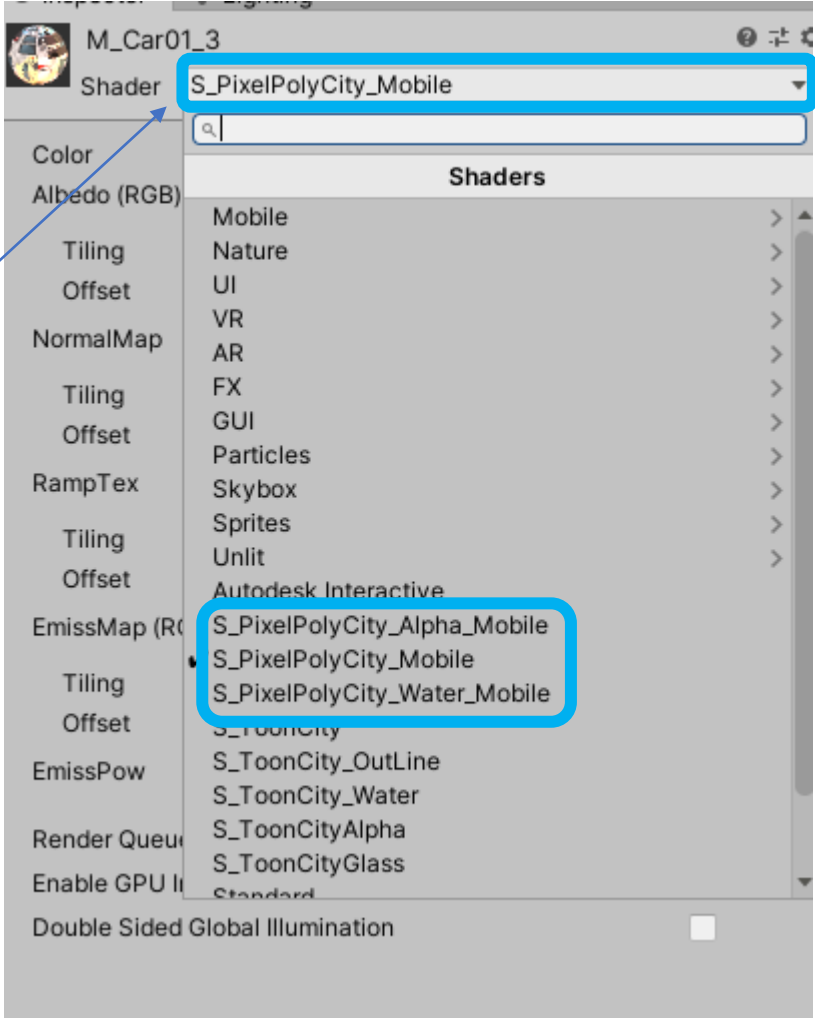

[City]
A city made of assets.
Modify this city to suit your
project

CHANGE SHADER FOR MOBILE

If the shader is too slow, switch to the mobile version shader

NOTICE

Clicking Fbx displays a warning message on the console.

This is because I used a shader created using the Amplify shader.

Press the **Clear button** to clear the warning message.

Alternatively, you can purchase and import an Amplify shader.
This makes the material more versatile.
